

COLUMBIA INSTITUTE OF PHARMACY, RAIPUR (C.G.)

Date: 11/02/2016

Dear Sir/Madam,

It gives me an immense pleasure to share that Columbia Institute of Pharmacy; Raipur is going to organize a Workshop on “**Development of Analytical Techniques for Indigenous Drugs of C.G.**” Under the aegis of **Chhattisgarh Council of Science & Technology, Raipur on 26th-27th February 2016.**

Development of various analytical techniques for the herbal plants has been a critical issue for the entire researcher and the academicians. Various analytical techniques are available for standardization of the herbs, but it still requires more accurate and precise methods.

Considering these issues, we are organizing this workshop, where experts from industry, Academia and research Institutions are invited to share their opinions and experiences and make it a brain storming session for the participants. We are looking forward that this national workshop will provide some substantial solution and strategies to tackle the above-mentioned issue.

We seek your strong support to make this national workshop a grand success and we hope that Scientists, faculty members, research scholars, PG students from your Institute /Organization will actively participate in this national workshop.

Kindly circulate this invitation widely in your institution and make this national workshop a grand success. The interested participant may give their consent in the attached Performa.

Yours sincerely,
Dr. Ravindra Kumar Pandey
