About Columbia Institute of Pharmacy

Columbia Institute of Pharmacy conducts B. Pharm & M. Pharm & Ph.D courses. Institute is managed and run by Jan Pragati Education Society. It imparts the best education in the field of pharmacy, in central India. It has lush green campus, modern architecture constructed with ultra modern facilities. It constantly produces quality professionals in the field of Pharmacy. B. Pharm course started in 2006. Post graduation course with specialization in pharmaceutics and pharmacology commenced in the year 2010 and in 2017 – 18 post graduation in pharmaceutical analysis and quality assurance was started. All the courses are approved by AICTE, New Delhi, PCI, New Delhi and affiliated to CSVTU, Bilai. Columbia Institute of Pharmacy is also an approved research centre of CSVTU, Bilai for conducting Ph.D programme.

CIP has signed an MOU with Burapha University, Thailand for student exchange programmes. The institute has a well maintained experimental animal house. The animal house is registered with the Committee for the Purpose of Control and Supervision of Experiments on Animals

(CPCSEA), Ministry of Environment and Forests, Govt. of India. CIP had developed cell line laboratory for conducting research. Two workshops were conducted to share the techniques and skills involved in handling cell culture. Various consultancy projects are carried by the Institute. Projects with more than Rs. 35 lakh were received from various Industries for formulation development, analytical method development and various animal studies. Columbia Institute of Pharmacy has organized two International Conferences. Institute has conducted more than 20 national workshops and seminars to improve skills of the students and teachers

About Pharmacy Council of India

The Pharmacy Council of India is a statutory body constituted under the Pharmacy Act, 1948. The Council was first constituted on 09th March, 1948 and has a proud and glorious history of 70 years of professional leadership. It is under the administrative control of the Ministry of Health & Family Welfare, Government of India. The Pharmacy Council of India is established for the purpose of regulating the profession and practice of pharmacy in the country. The main activities of the Council relate to the laying of minimum standards of education required for qualification as a pharmacist and the approval of the courses of study and examinations. The Council is also empowered to approve the qualifications granted by foreign countries on reciprocal basis provided that such qualification guarantees the requisite skill and knowledge to its satisfaction. In addition, the Council also maintains a Central Register which contains the names of all persons registered with the State Pharmacy Councils/ Registration Tribunals. PCI has been taking all possible steps to strengthen and upgrade the pharmacy curriculum to produce competent pharmacist workforce which will be able to meet the growing demands of the industry and community.

About Continuing Education Programme

Pharmacy profession is progressing very rapidly with advancements in drug discovery, development, manufacture, hospital pharmacy, patient care etc. Indian pharmaceutical industry has registered a spectacular growth in the recent years. CEP provides an opportunity to faculty members to update their knowledge and skills. This will enhance the teaching & research standards and helps in dealing with the rapid changes and shifting paradigms in pharmacy education and health care systems. This will enable the graduating students to meet the challenges that the profession demands.

CEP is aimed to widen the perspective and knowledge base for Pharmacy Teachers. It should also serve to enhance the skills of faculty members and enable them to improve Pharmacy profession. This programme is designed to meet the requirements of the Pharmacy teachers to enhance competency and knowledge of updates in Pharmacy profession

About Theme

The ever expanding pharmaceutical sector experience number of advancements gradually and steadily. These updates are not included or covered in syllabi of Pharmacy courses. Moreover, the faculty members are not equipped with these updates. Every teacher has their own aptitude and attitude. When a teacher teaches, students appear for exam, however, when teacher learns, students also learn. This programme aims to bring paradigm shift in attitude of faculty members, from a teacher who teaches to a teacher who learns. This program intends to provide opportunities for the teacher to acquaint themselves with recent developments in teaching and learning methods, enhance their knowledge and skills. The objective of this programme is to make teachers

- Improve the productivity of teaching
- Learners
- Describe and choose from the signature pedagogies used in the pharmacy education
- Motivate to use case method of teaching in appropriate learning contexts
- Aware of preparations required for the successful use of case based approach, elements of a good research proposal
- Improve understanding of qualitative & quantitative data analysis tools & techniques
- Acquaint with the use of selected qualitative and quantitative software
- Publish in top-notch journals by understanding the expectations of editor of such journals
