

## **Success stories**

**Batch no.: 2011-2013**

### **PARAG JAIN**

I was completed my graduation in 2011 and post graduation in 2013. I was awarded Summer Research Fellowship in 2012 by Indian Academy of Sciences, Bangalore. I got training in AIIMS, Delhi and IIM, CSIR, Jammu for research that would ever being a milestone journey in my life. Thanks to our college Columbia Institute of Pharmacy, Raipur that allowed us to go outside for research work. Later on I pursued my career in teaching and research. I was selected for Senior Research Fellow, ICMR, New Delhi in 2014 but I was unable to join and started woking as Assistant Professor at GGV, Central University, Bilaspur. Meanwhile I have been trying to do something new that should be useful and generate employment for others. I started Probecell: Scientific Writing Services as self employment in 2017 and now we have eight editors in the groups. We have been getting good response and recommendations from our clients that promote us to do better. Recently, we have added services of Book Publication and soon launching Plagiarism Detection Software under Probecell. I registered for Ph.D. in 2018 from CSVTU, Bhilai. I have awarded Young Scientist Award, by CCOST, Chhattisgarh in 2019 for my Ph.D. research work. I am Co-Founder of the startup Praktikum Agritech LLP, Balod based on production of cattle feed from agri wastes. Currently, I am working as Assistant Professor at CSIP, Drug. With good deed and vision I am working more to explore our profession and pavement the way for the coming generation.

Best wishes

Parag Jain

**GULAB SAHU**

**Batch no.: 2007-2011**

I personally feel, struggle is a part and parcel of every success story. Now, before anyone concludes anything, it's important to understand that success is not a destination but a journey! Let me share my story I come from a very tiny place Chhattisgarh, I studied till 10th in a typical Hindi medium background school where English alphabet was taught from class five only! All the books used to be in pure Hindi till class 10 and then the story changed completely in 12th where the medium of instruction is pure English. But then I decided to bachelor degree in pharmacy in English because that is where the future lied in. I have complete bachelor degree from Columbia institute of pharmacy. After graduation, I took every single opportunity to learn and converse in English. My eldest brother, who was from an English background, kept helping me throughout my school and college days to help me in my journey. I grabbed an opportunity to marketing executive in reputed pharmacy company. After 6 month experience in marketing field, I have started my own marketing company valt in health care pvt ltd. recently I have stated my medical shop in Raipur.

Best wishes

**THOUGHTS FOR CIP**

CIP is not an education institution but an important part of my life which has actually shaped not only my career but also my personality. As a person, it has helped to grow and motivated me to face all the problems with grace and wisdom.

It has actually reached a milestone, and is considered to one of the best pharmacy colleges in Chhattisgarh, which is only possible because of the excellent faculty and management
